

You can download the installation package for the Cisco AnyConnect VPN client for the operating systems below from [OIT Software Downloads](#).

- Windows
- Mac OS X 10.6 and Higher
- Mac PowerPc
- Linux (RHEL 5 & 6 Desktop, Ubuntu 9.x & 10.x) *

1) After running the installation, you will want to connect to the server **vpnaccess.nd.edu**

2) Enter your username in the form: **netid.nosplit** (e.g. **jdoe1.nosplit**) along with your **Notre Dame password**.

3) Click **OK** to connect.

Once you have connected to the nosplit VPN group, all of your network traffic (including that destined for Google) will route through Notre Dame and make Google available.
